Experience

2012-present

Midweight designer, Global Trade Review (GTR)

Had to devise and present multiple design concepts to different departments within the company. Meeting tight deadlines for brochures, leaflets, web banners, magazine layouts and adverts, illustrations, large format artwork and presentations.

Key achievement: planned and led design process of the new responsive website for GTR. Was responsible for site-map architecture followed by website wireframes and mock-ups for multiple devices, also, at a later stage of the project, UI testing. Played a key role in liaison with numerous teams including web developers, editorial and marketing.

2011-2012

Freelance graphic designer

Providing a range of print and web designs for different clients. Projects mainly included client presentations and reports, posters and design mock-ups for a responsive website.

2010-2011

Graphic designer, 111 project

Designed a 3D CAD model of the USB token and dealt with the suppliers from China to manufacture it. Produced (filmed and edited) 111 event's documentary video.

2010

Design intern, University of the Arts London

Designed a digital booklet featuring Knowledge Transfer Partnerships (KTP) case studies.
